City of Wisconsin Dells – Implementation Element

s. 66.1001(2)(i) Wis. Stats.

The Implementation Element is a compilation of programs and specific actions to be completed in a stated sequence, including any proposed changes to any applicable zoning ordinances, official maps, sign regulations, erosion and storm water control ordinances, historic preservation ordinances, site Plan regulations, design review ordinances, building codes, mechanical codes, housing codes, sanitary codes or subdivision ordinances, to implement objectives, policies, Plans and programs contained in pars. (a) to (h). The Element shall describe how each of the Elements of the Comprehensive Plan will be integrated and made consistent with the other Elements of the Comprehensive Plan, and shall include a mechanism to measure the local government's progress toward achieving all aspects of the Comprehensive Plan. The Element shall include a process for updating the Comprehensive Plan. A Comprehensive Plan under this subsection shall be updated no less than every 10 years.

Introduction

City of Wisconsin Dells – Implementation Element

Introduction

Of all the steps in the Planning process, implementation has typically been the most problematic for the vast majority of communities with a Comprehensive Plan. Adoption of a Comprehensive Plan marks the beginning of a critical new phase – implementation. Without implementation, a Plan is of little value.

Wisconsin’s “Smart Growth” legislation places great emphasis on Implementation. By January 1, 2010, all actions of a local government that affect land must be consistent with its Comprehensive Plan, if it has one. This means that a great deal of effort is still needed following Plan adoption to bring the City’s rules and regulations into compliance.

“Implementation involves any action or activity following Plan adoption that helps to achieve the vision outlined in this Plan.”

Implementation Schedule

This section is intended to provide a listing of all those actions and activities necessary to implement the spirit and intent of this Plan. The various actions are grouped into categories for organizational purposes, some of which correspond to various Elements of the Plan.

Given the range and scope of activities that must be done by 2010, it should be apparent that it will take a number of years to fully implement this Plan. Some actions are more pressing than others. Some actions are quite easy to accomplish while others will involve more effort and will therefore take more time. Consequently, a completion date is included to present a timetable for action. In addition, the responsible party for completing the action is included as well.

Some of the activities, once completed, can be removed from this listing. Other activities are on-going and should not be removed. It is recommended that the City Council conduct an annual review of this section to ensure that the steps and actions necessary to implement the Plan are being done in a timely manner.

In addition to the above state agency resources, it should be noted that Wisconsin is home to some 1,160 private foundations. The Marquette University Raynor Library annually publishes *Foundations in Wisconsin: a Directory*. It is the only directory of its kind which covers every active, grant-making foundation in the state of Wisconsin. 1,160 foundations are profiled, including contact information, total assets, grants paid and areas of interest. The directory is available in print and online formats. You can find out more about this resource by visiting the following web site: <http://www.marquette.edu/fic/>
